Introduction

Welcome to Aromacare's inventory management system. This user guide is designed to provide documentation for people who will use this system on a day-to-day basis. This document is designed to be read by Aromacare's management and production team. Apart from the regular login process, it is worth noting that different users will have different accesses to the features documented below.

Software Download

First, we need to download several pieces of software to allow a user to run the website locally on their own computer without being visible to anyone from the internet.

Install Instructions for Windows

<https://www.wikihow.com/Install-XAMPP-for-Windows>

Install Instructions for MacOS

<https://dev.to/honorezemagho/xampp-installation-step-by-step-on-macos-4hi2>

Install Instructions for Linux

<https://www.wikihow.com/Install-XAMPP-on-Linux>

Manage Accounts

Regular Account Login

By logging in, you will be given access to the products' recipes (accounts are used for this purpose only).

1. Navigate to the system, click the 'Login' button on the top right corner.

2. Enter your email address and password, then click 'Login'.
3. The products' recipes are now accessible for you.

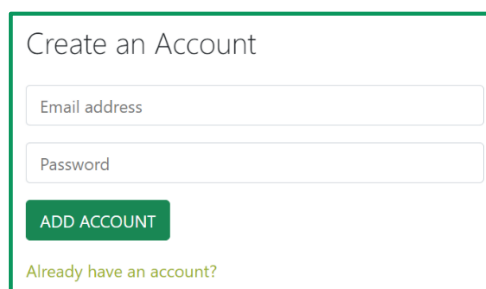

Add a New Admin Account

Aromacare's business owner can login and create admin accounts.

1. Click 'Add Account' to add new admin accounts (will only be visible when logged in the business owner's account).

2. Enter email address and password for new account.

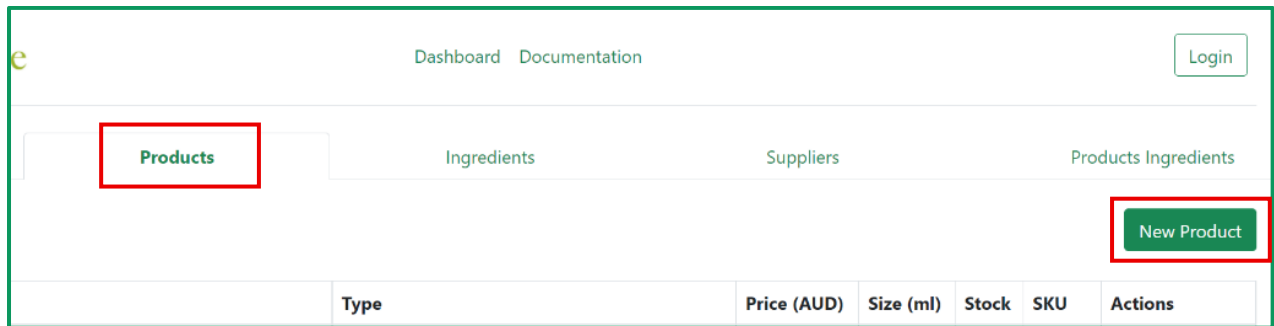

A screenshot of the 'Create an Account' form. The form has a title 'Create an Account' at the top. Below the title are two input fields: 'Email address' and 'Password'. At the bottom of the form is a green button labeled 'ADD ACCOUNT'. Below the button is a link that says 'Already have an account?'.

3. Click 'Add Account' to save new login credentials.

Manage Products

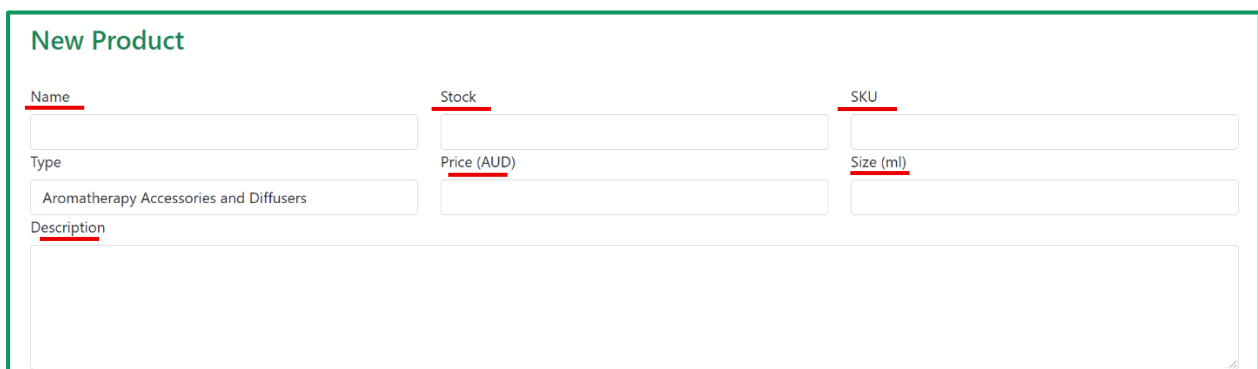

Add a New Product

1. From the Dashboard, navigate to the 'Products' tab and click 'New Product'.

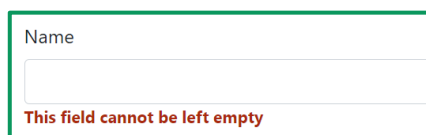

The screenshot shows a dashboard with a top navigation bar containing 'Dashboard' and 'Documentation' links, and a 'Login' button. Below the navigation bar is a tabbed interface with four tabs: 'Products', 'Ingredients', 'Suppliers', and 'Products Ingredients'. The 'Products' tab is selected and highlighted with a red box. In the top right corner of the 'Products' tab, there is a green 'New Product' button, also highlighted with a red box. Below the tabs is a table with the following columns: Type, Price (AUD), Size (ml), Stock, SKU, and Actions.

2. Enter appropriate data into the input box (Name, Stock, SKU, Price, Size), error messages will appear for invalid data.

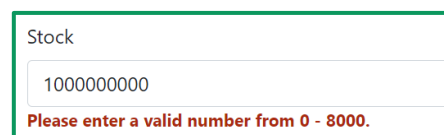

The screenshot shows the 'New Product' form. It has a title 'New Product' at the top. Below the title are six input fields: Name, Stock, SKU, Type, Price (AUD), and Size (ml). The 'Name' field has a red error message below it: 'This field cannot be left empty'. The 'Stock' field has a red error message below it: 'Please enter a valid number from 0 - 8000'. The 'Type' field is a dropdown menu with 'Aromatherapy Accessories and Diffusers' selected. The 'Price (AUD)' and 'Size (ml)' fields are empty. The 'Description' field is a large text area at the bottom.

Name

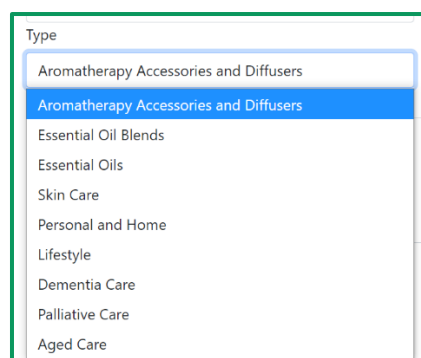

This field cannot be left empty

Stock

Please enter a valid number from 0 - 8000.

3. Select one matching product type and recipe from the dropdown lists.

Type
Aromatherapy Accessories and Diffusers
Aromatherapy Accessories and Diffusers
Essential Oil Blends
Essential Oils
Skin Care
Personal and Home
Lifestyle
Dementia Care
Palliative Care
Aged Care

4. Select matching ingredient(s) for the product.

3.
 - a. Click 'Add Recipe' to add the recipe and related information to the system.
 - b. Click 'List Recipes' to leave current page and view list of existing recipes (current data entered will not be saved).

View a Recipe

1. From the Dashboard, navigate to 'Recipes' tab and input the keywords on the top right corner to search for the recipe you want to view.
2. Click 'View' under the 'Actions' tab, view any recipe that you needed.

Recipe 1

Calming Massage & Body Oil

Step 1
Preheat oven to 180C or 160C fan-forced. Line 2 baking trays with baking paper. Using an electric mixer or whisking by hand, beat [butter](#) and [sugars](#), and 1-2 minutes or until smooth and well combined. Beat in [egg](#) and [vanilla](#) until combined.

Step 2
Stir in [flour](#). Stir in [dark](#) and [milk choc bits](#). Roll 2 level tablespoonfuls of mixture into balls and place on prepared trays, 3cm apart. Press down slightly. Decorate with extra choc bits.

Step 3
Bake for 15-18 minutes or until light golden and cooked. Transfer to a wire rack to cool. Store in an airtight container for up to 1 week.

3.
 - a. Click 'Edit Recipe' to edit the current recipe's information.
 - b. Click 'Delete Recipe' to delete the current recipe.
 - c. Click 'List Recipes' to leave current page and view list of existing recipes.
 - d. Click 'New Recipe' to add a new recipe.

Edit a Recipe

1. From the Dashboard, navigate to 'Recipes' tab and input the keywords on the top right corner to search for the recipe you want to edit.
2. Click 'Edit' under the 'Actions' tab, edit any information that you want to update.

3.
 - a. Click 'List Recipes' to leave current page and view list of existing recipes (current changes will not be saved).
 - b. Click 'Delete Recipe' to delete current recipe from system.
 - c. Click 'Save Changes' to save new changes to current recipe.

Delete Recipe(s)

1. From the Dashboard, navigate to 'Recipes' tab and input the keywords on the top right corner to search for the recipe you want to edit.
2. Click 'Delete' under the 'Actions' tab, delete any recipe that you needed.

Ingredient Threshold

Set/Update Ingredient Threshold

1. From the Dashboard, go to 'Update Ingredient Order Threshold' section.
2. Select one ingredient to set/update threshold from dropdown list.
3. Enter the threshold limit.
4. Click 'Save Changes' to set/update threshold limit for selected ingredient.

Backup and Recovery

Good practises are highly advised for database and system backup/recovery.

Recommended Practises

1. Develop a comprehensive backup plan.
2. Perform effective backup management.
3. Schedule periodical backup archiving.
4. Retain copies of the database insert commands.
5. Perform trial restorations.
6. Do not store backups on the same computer/disk that you are backing up.

Troubleshooting

When do I need to login?

You only need to log in using your given account authorised by your business owner when you want to access recipes. No account login process required if you just want to perform general data crunching.

How can I navigate back to the homepage?

There are navigation buttons on most of the pages that provide redirection to other pages however if at any point you are lost clicking on the 'Aromacare' banner in the top left of the screen will bring you back to the homepage.

What happens if the site is unexpectedly slow?

Whilst this has not appeared at all in testing, we would suggest either waiting for the page to load or navigate back to the homepage by clicking on the logo. Also be sure to check that your internet connection is active if the site is not loading correctly.
